Brief Description of Arguments to be Presented:

See attached Agenda

An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

(Applicant/Applicant's Representative Signature)

(Examiner/SPE Signature)

This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which it is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 121 and 37 CFR 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

1 PM.AGENDA FOR TELEPHONE INTERVIEW

Sir:

I would like to request a telephone interview on April 22, 2004. Please consider the following topics for discussion:

- Daigle teaches receiving queries for a Swedish Telephone Directory in two or more different protocols. However, Daigle does not teach an OID abstraction layer that is capable of receiving queries for objects in two or more different protocols.
- Receiving queries in a plurality of protocols may be generally known; however, an OID abstraction layer that is capable of receiving queries in a plurality of protocols is not shown in the prior art. Applying techniques used to locate people in a whitepages directory service in an OID abstraction layer would require undue experimentation and would amount to an inventive leap that can only be made with the benefit of Applicants' disclosure.
- Spofford does not teach or suggest an OID abstraction layer. Whitehead does not teach or suggest an OID abstraction layer that receives an OID tree structure from a repository and registers the tree structure with a registry associated with the OID abstraction layer. Daigle does not make up for the deficiencies of Spofford and Whitehead.

The Examiner is invited to call at the below-listed telephone number to confirm or reschedule the requested telephone interview.
